## Keeping things clean since 1858

**Now more than ever, it is essential to be well prepared and thoroughly familiar with the cleaning and disinfection operations required for an effective prevention and infection control, including the right products to use.**

The COVID-19 outbreak caused major changes in people's daily habits. It brought devastating effects all over the world, particularly for the companies, which have been forced to come up with new business models and reinvent their everyday working methods.

We want to support you in answering to these challenges, sharing our cleaning experience and know-how and creating customized programs to protect your customers' health.

We offer a concrete support to help you prevent the microorganisms' spread and protect your employees and customers' health with dedicated procedures for disinfecting surfaces and spaces.

We have split the market into various business sectors and fields of application, setting up advantageous offers specifically tailored to each type of customer needs. From the extensive Sutter Professional range we have chosen specific products for each business sector and every kind of space, showing their properties and compliance with the strictest disinfection standards.

# THE REGULATORY FRAMEWORK

Sutter Professional is committed to propose solutions aimed to inhibit the effects of microorganisms such as bacteria, fungi and viruses in order to safeguard the human health.

The microorganisms' transmission can take place:

- **By air** (through dust or droplets)
- **By direct contact** (contact between body surfaces)
- **By indirect contact** (through contaminated objects or surfaces that act as an intermediary)

The risk of microorganisms' transmission can only be eradicated using surface disinfectants that meet at least one of the following EN standards:

## **EN 1276 (including EN 1040):**

### **Chemical disinfectants and antiseptics**

- The standard requires a quantitative test in suspension to evaluate the bactericidal action of chemical disinfectants and antiseptics used in food & beverage, industrial, domestic and community environments.

## **EN 1650: Chemical disinfectants and antiseptics**

- The standard requires a quantitative test in suspension to evaluate the fungicidal action of chemical disinfectants and antiseptics used in food & beverage, industrial, domestic and community environments.

## **EN 13697: Chemical disinfectants and antiseptics**

- The standard requires a quantitative test on a non-porous surface to evaluate the bactericidal and/or fungicidal action of chemical disinfectants and antiseptics used in food & beverage, industrial, domestic and community environments.

## **EN 13727: Chemical disinfectants and antiseptics**

- The standard specifies a test method and the minimum requirements for bactericidal activity of chemical disinfectant and antiseptic products that form a homogeneous, physically stable preparation when diluted with hard water, or - in the case of ready-to-use products - with water.

## **EN 13624: Chemical disinfectants and antiseptics**

- The standard specifies a test method and the minimum requirements for fungicidal or yeasticidal activity of chemical disinfectant and antiseptic products that form a homogeneous, physically stable preparation when diluted with hard water, or - in the case of ready-to-use products - with water.

**EN 14476: Chemical disinfectants and antiseptics**

- The standard requires a quantitative suspension test to evaluate the virucidal action in the medical field.

Disinfectants for human use (e.g. hand-washing soaps with rinsing), on the other hand, must meet one of the following EN standards:

**EN 1276: Chemical disinfectants and antiseptics**

- The standard requires a quantitative test in suspension to evaluate the bactericidal activity of chemical disinfectants and antiseptics used in food & beverage, industrial, domestic and community environments.

**EN 1499: Chemical disinfectants and antiseptics**

- The standard requires a test that simulates practical hand-washing conditions to determine if the product reduces the transient bacterial flora.

**EN 1650: Chemical disinfectants and antiseptics**

- The standard requires a quantitative test in suspension to evaluate the yeasticidal action of chemical disinfectants and antiseptics used in food & beverage, industrial, domestic and community environments.

**EN 13727: Chemical disinfectants and antiseptics**

- The standard specifies a test method and the minimum requirements for the bactericidal activity of chemical disinfectant and antiseptic products that form a homogeneous, physically stable preparation when diluted in hard water, or - in case of ready-to-use products - in water.

**EN 13624: Chemical disinfectants and antiseptics**

- The standard specifies a test method and the minimum requirements for the fungicidal or yeasticidal activity of chemical disinfectant and antiseptic products that form a homogeneous, physically stable preparation when diluted in hard water, or - in case of ready-to-use products - in water.

**EN 1500: Chemical disinfectants and antiseptics**

- The standard specifies a test method that simulates the practical conditions to establish if a product for the hygienic handrub reduces the transient microbial flora.

# Healthcare

Each area requires specific procedures and operations to ensure sanitation and disinfection.

Here follows a list of products and procedures required to achieve the best results in compliance with the strictest European regulations.

HANDS

**DERMAGEL PLUS**

Disinfectant\* no-rinse hand gel with 76% of alcohol and antimicrobial action

**In compliance with the following EN Tests standards\*: 1276, 1500, 1650, 13624, 13727, 14476**

**76% ALCOHOL**

COUNTERS, FURNITURE, PLEXIGLASS, WASTEPAPER BASKETS, CONVECTOR HEATERS

**MULTIGIENIC**

Disinfectant\* degreaser based on quaternary ammonium salts and phenylphenol for cleaning all surfaces

**In compliance with the following EN Tests standards\*: 1040, 1276**

**(Legionella Pneumophila included), 13697, 14476**

PHONES, MONITORS, POS TERMINALS, GLASSES, MIRRORS, FABRICS

**XTRA-ALKO**

Hydroalcoholic ready to use sanitizing\* detergent with 76% of alcohol suitable for all washable surfaces.

Also suitable for fabrics/masks\* sanitation\*\*

**In compliance with the following EN Tests standards\*: 1276, 1650, 13624, 13697, 13727, 14476**

HANDS

**HANDS SANITIZING TOUCHLESS STATION**

Self-standing, telescopic and mobile stand made up of a base, support, drip guard, panel and automatic dispenser (photocell technology)

DOORS, HANDLES, HANDRAILS

**XTRA-OXY**

Hydrogen peroxide-based ready to use sanitizing\* detergent suitable for all washable surfaces

**In compliance with the following EN Tests standards\*: 1276, 13697**

FLOORS

**ONDA**

Disinfectant\*-detergent scented deodorant based on quaternary ammonium salts suitable for the daily disinfection of the washable surfaces

**In compliance with the following EN Tests standards\*: 1040, 1276, 13697**

**ONDAKLOR**

Oxidising chlorine disinfectant\* with cleaning action for cleaning and disinfecting\* floors and washable surfaces

**In compliance with the following EN Tests standards\*: 1276, 1650, 13697, 14476**

SURFACES	PRODUCT	EFFECTIVENESS	SYSTEM	ACTION	FREQUENCY
Hands	DERMAGEL PLUS	Disinfectant* with 76% of alcohol and with bactericidal, yeasticidal and virucidal action	Dispenser and manual	Disinfection*	As needed
	HANDS SANITIZING TOUCHLESS STATION	Telescopic column with dispenser no-touch	Automatic dispenser with photocell technology	-	-
Counters - Furniture Plexiglass - Wastepaper Baskets - Convector Heaters	MULTIGIENIC	Disinfectant* with bactericidal, fungicidal and virucidal action	Blue microfibre cloth	Cleaning and Disinfection*	Daily
Doors - Handles Handrails	XTRA-OXY	Hydrogen peroxide-based ready to use sanitizing* detergent with bactericidal action	Blue microfibre cloth	Cleaning and Sanitisation*	Daily
Phones - Monitors Pos Terminals - Glasses Mirrors - Fabrics	XTRA-ALKO	Sanitizing* detergent with 76% of alcohol and with bactericidal, fungicidal and virucidal action	Spray on the surfaces and wipe the single-use paper cloth	Cleaning and Sanitisation*	Daily
Floors	ONDA	Disinfectant* with bactericidal action	Double trolley with microfibre flat fringe	Cleaning and Disinfection*	Daily
	ONDAKLOR	Disinfectant* with bactericidal, fungicidal and virucidal action	Double trolley with microfibre flat fringe	Cleaning and Disinfection*	Weekly

\*Regulatory requirements surrounding the biocidal registration may vary according to each Country. \*\*Use on fabrics: spray the product from a distance of at least 50 cm. Before using, check the compatibility with the fabrics on a hidden area. Be particularly careful on wool, silk, linen, lycra, polyamide, acrylic and printed fabrics. Use on masks: spray the product from a distance of at least 50 cm and aerate the mask for at least 30 minutes before reuse

## HOSPITAL ROOMS

### HANDS

#### DERMAGEL PLUS

Disinfectant\* no-rinse hand gel with 76% of alcohol and antimicrobial action

**In compliance with the following EN Tests standards\*: 1276, 1500, 1650, 13624, 13727, 14476**

**76% ALCOHOL**

#### ANTIBAC CREAM

Disinfectant\* handwash cream based on chlorhexidine. Eliminates up to 99,9% of bacteria and fungi

**In compliance with the following EN Tests standards\*: 1276, 1499**

### FURNITURE

#### MULTIGIENIC

Disinfectant\* degreaser based on quaternary ammonium salts and phenylphenol for cleaning all surfaces

**In compliance with the following EN Tests standards\*: 1040, 1276 (Legionella Pneumophila included), 13697, 14476**

### DOORS, HANDLES

#### XTRA-OXY

Hydrogen peroxide-based ready to use sanitizing\* detergent suitable for all washable surfaces

**In compliance with the following EN Tests standards\*: 1276, 13697**

### CONTACT POINTS, FABRICS, GLASSES, MIRRORS, POLISHED SURFACES

#### XTRA-ALKO

Hydroalcoholic ready to use sanitizing\* detergent with 76% of alcohol suitable for all washable surfaces.

Also suitable for fabrics/masks' sanitation\*\*

**In compliance with the following EN Tests standards\*: 1276, 1650, 13624, 13697, 13727, 14476**

### FLOORS

#### ONDA

Disinfectant\*-detergent scented deodorant based on quaternary ammonium salts suitable for the daily disinfection of the washable surfaces

**In compliance with the following EN Tests standards\*: 1040, 1276, 13697**

#### ONDAKLOR

Oxidising chlorine disinfectant\* with cleaning action for cleaning and disinfecting\* floors and washable surfaces

**In compliance with the following EN Tests standards\*: 1276, 1650, 13697, 14476**

### WASTEPAPER BASKETS

#### ONDA RTU

Disinfectant\*-detergent scented deodorant ready to use based on quaternary ammonium salts suitable for the daily disinfection of the washable surfaces

**In compliance with the following EN Tests standards\*: 1276, 1650, 13697**

SURFACES	PRODUCT	EFFECTIVENESS	SYSTEM	ACTION	FREQUENCY
Hands	DERMAGEL PLUS	Disinfectant* with 76% of alcohol and with bactericidal, yeasticidal and virucidal action	Dispenser and manual	Disinfection*	As needed

LINEN ROOM AND GUESTS

**ENZY EXTRA**

Concentrated complete enzymatic detergent for manual and automatic washing of fabrics  
**Ecolabel License: IT/039/004**

**PER ACTIVE**

Peracetic acid and hydrogen peroxide-based fabric disinfectant\* agent for use in the washing machine  
 In compliance with the following  
**EN Tests standards\*: 1276, 1650, 13697, 13727, 13624, 14348, 14476**

**ALKA POWER**

High concentrated alkaline additive with sequestering power for automatic washing of fabrics

**SOFT POWER CAPS**

Concentrated softener with long lasting scent for manual and automatic washing of fabrics

**CHLOR ACTIVE**

Chlorine-based whitener for automatic washing of all white or chlorine-resistant fabrics  
**In compliance with the following  
 EN Tests standards\*: 13697, 14476**

SURFACES	PRODUCT	EFFECTIVENESS	SYSTEM	ACTION	FREQUENCY
	ENZY EXTRA	-	Professional washing machine	Cleaning	Daily
	ALKA POWER	-	Professional washing machine	Cleaning	Daily
Linen Room and Guests	CHLOR ACTIVE	Chlorine-based whitener with bactericidal, fungicidal and virucidal action	Professional washing machine	Bleaching	Daily
	PER ACTIVE	Peracetic acid and hydrogen peroxide-based disinfectant* with bactericidal, yeasticidal, fungicidal, sporicidal and virucidal action	Professional washing machine	Disinfection*	Daily
	SOFT POWER CAPS	-	Professional washing machine	Softener and scent	Daily

\*Regulatory requirements surrounding the biocidal registration may vary according to each Country.

FRINGE AND CLOTHES

**ENZY EXTRA**

Concentrated complete enzymatic detergent for manual and automatic washing of fabrics  
**Ecolabel License: IT/039/004**

**ONDA**

Disinfectant\*-detergent scented deodorant based on quaternary ammonium salts suitable for the daily disinfection of the washable surfaces  
**In compliance with the following EN Tests standards\*: 1040, 1276, 13697**

**ALKA POWER**

High concentrated alkaline additive with sequestering power for automatic washing of fabrics

**ONDAKLOR**

Oxidising chlorine disinfectant\* with cleaning action for cleaning and disinfecting\* floors and washable surfaces  
**In compliance with the following EN Tests standards\*: 1276, 1650, 13697, 14476**

**PER ACTIVE**

Peracetic acid and hydrogen peroxide-based fabric disinfectant\* agent for use in the washing machine  
**In compliance with the following EN Tests standards\*: 1276, 1650, 13697, 13727, 13624, 14348, 14476**

SURFACES	PRODUCT	EFFECTIVENESS	SYSTEM	ACTION	FREQUENCY
Fringe and Clothes	ENZY EXTRA	-	Professional washing machine	Cleaning	Daily
	ALKA POWER	-	Professional washing machine	Cleaning	Daily
	PER ACTIVE	Peracetic acid and hydrogen peroxide-based disinfectant* with bactericidal, yeasticidal, fungicidal, sporicidal and virucidal action	Professional washing machine	Disinfection*	Daily
	ONDA	Disinfectant* with bactericidal action	Double trolley with microfibre flat fringe	Cleaning and Disinfection*	Daily
	ONDAKLOR	Disinfectant* with bactericidal, fungicidal and virucidal action	Double trolley with microfibre flat fringe	Cleaning and Disinfection*	Weekly

# Environments sanitation through spraying

Now more than ever, it's important to **sanitize** public and private spaces and workplaces. Sutter Professional offers several products to be used with different disinfection systems **in compliance with the regulatory requirements** for bacteria and viruses' inactivation. The sanitation through disinfectant sprays is **essential** because it exponentially increases

the contact area, widening the disinfecting effect and reducing the service delivery time thanks **to an improved microbe count's reduction**. Spraying is the perfect way of sanitizing washrooms, as well as offices, supermarkets, sales areas, hotel rooms, vehicles, ticket offices and train stations, airport terminals and much more.

## SURFACES NOT IN CONTACT WITH FOOD

### CLEANOX

Hydrogen peroxide-based concentrated sanitizing\* detergent suitable for all washable surfaces

**In compliance with the following EN Tests standards\*: 1276, 13697**

## ALL THE SURFACES (EXCLUDING FABRICS)

### TABS CHLORINE

Dichloroisocyanurate-based effervescent sanitising\* tablets with bleaching action for all types of surfaces

**In compliance with the following EN Tests standards\*: 1276, 13697**

## SURFACES IN CONTACT WITH FOOD

### AGRASAN PER

Peracetic acid and hydrogen peroxide-based detergent for all the surfaces.

Also suitable for cleaning in CIP

**In compliance with the following EN Tests standards\*: 1276, 1650, 13697, 13727, 13624, 14348, 14476**

SURFACES	PRODUCT	EFFECTIVENESS	SYSTEM	ACTION	FREQUENCY
Surfaces not in contact with food	CLEANOX	Hydrogen peroxide-based concentrated sanitizing* detergent with bactericidal action	Pressure	Spraying	Monthly
Surfaces in contact with food	AGRASAN PER	Peracetic acid and hydrogen peroxide-based detergent with bactericidal, yeasticidal, fungicidal, sporicidal and virucidal action	Pressure	Spraying	Monthly
All the surfaces (excluding fabrics)	TABS CHLORINE	Sanitising* dichloroisocyanurate-based tablets with bactericidal and yeasticidal action	Pressure	Spraying	Monthly
